DOWN

1 Down: A test used to measure a student’s immediate and delayed memory ability along with the acquisition of new learning.

2 Down: This international assessment measures 15-year-old students’ reading, math, and science literacy every 3 years. On the 2018 results, U.S. students ranked 8th in reading, 11th in science, and 30th in math.

3 Down: _____ v. Commonwealth of Pennsylvania (1971), a landmark court case regarding the educational rights of children with disabilities. Prior to this, children with intellectual disabilities did not have the right to a free public education.

4 Down: On the WIAT-III, there was a question with the word “desks” in it. In order for school psychologist to enunciate this word clearly, they would add a few more of these to the end of the word.

ACROSS

1 Across: An intelligence test commonly used for preschool-aged children.

5 Across: Alternatively, you could use this intelligence test for the students mentioned in 1 across.

6 Across: This helps identify symptoms of ASD in children and adolescents.

7 Across: Computers that some school psychologists prefer working on

WHY CROSSWORD PUZZLES?

School psychologists always work together in multi-disciplinary teams to problem solve how to help students. Meeting the unique needs of a student can be similar to solving a puzzle. It is intended that school psychologists work together in groups on these crossword puzzles to demonstrate how each person’s knowledge and experience contributes to solving the puzzle. This symbolizes the importance of collaboration among team members when working together to help students. It is also a great team-building exercise with the added benefit of school psychologists learning new things about their job.
